

# Results of Commissioning/Routine Testing of Power Swing Blocking Relay YTO

Name of Substation..... Date ..... Protection ..... C.T.R.....  
 Name of Feeder..... Settings .....

Mfg. Nr. ....

## (A) Phase to Phase/Phase to Neutral Injection of Power Swing Blocking Relay YTO.

| Phase | Direction<br>of<br>current | Relay<br>ohmic Sett-<br>ing ZR in<br>ohms | N | Impedance to<br>be set on ZFB<br>Test Set<br>$= \frac{ZR}{N}$ | Impedance Set on ZFB Set |   |       | Source<br>Impeda-<br>nce in<br>ohms | Observ-<br>ed %<br>Potenti-<br>al<br>P' | Theo-<br>retical<br>% Pote-<br>ntial<br>P | % Error<br>$\frac{P' - P}{P} \times 100$ | Remarks |    |
|-------|----------------------------|---|---|---|--------------------------|---|-------|-------------------------------------|---|---|--|---------|----|
|       |                            |   |   |   | Taps on                  | Z | Angle |                                     |   |   |  |         |    |
| 1     | 2                          | 3   | 4 | 5   | 6                        | 7 | 8     | 9                                   | 10                                      | 11  | 12                                       | 13      | 14 |
| A-N   | Normal                     |   |   |   |                          |   |       |                                     |   |   |  |         |    |
| A-N   | Reverse                    |   |   |   |                          |   |       |                                     |   |   |  |         |    |

## (B) Switch-on Tests of Voltage Regulators.

| Type of Test             | For just glow LP <sub>1</sub> Lamp or +18V on test socket |                   | For Maximum Glow of LP <sub>1</sub> Lamp or +22V on test socket |                   | Remarks |
|--------------------------|---|-------------------|---|-------------------|---------|
|                          | Observed Value  | Theoretical Value | Observed Value  | Theoretical Value |         |
| Voltage Switch-on<br>A-N |   |                   |   |                   |         |
| Current Switch-on<br>A-N | Not Required  |                   |   |                   |         |

(1) Check Operation of 97 W relay & record operating voltage :

WARNING :—The current switch on test should be performed as quickly as possible to avoid damage of voltage regulator.
